

## EXAMPLES OF ALLOWED

# Outdoor Facility Configurations

- i. Must allow air to flow freely through the entire space, AND
- ii. Must have at least 50% of its perimeter open, AND
- iii. May not have closed sides that form a corner.

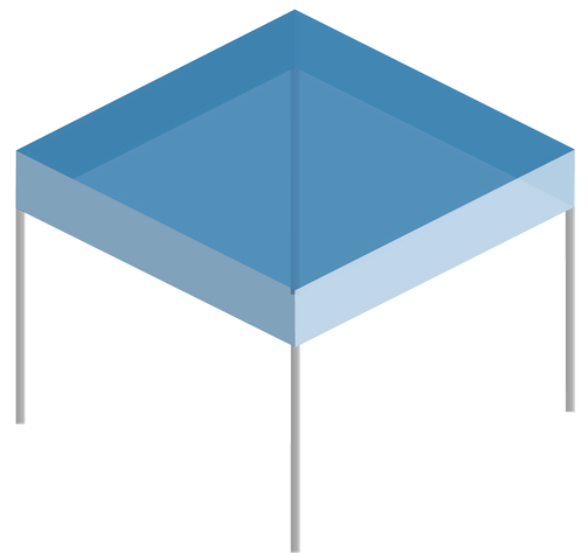

Note: Whether a facility is "outdoor" depends on how its sides are set up. It does not matter whether or not the facility has a canopy, roof, or other overhead covering.

Please see the FAQ page for more information.
