## The VaxUp Video Contest Helpful Hints and Tips

- **Use positive emotions** such as empowerment, love, excitement, hope, humor, etc. The idea is to connect positive emotions with positive health behaviors.
- **Avoid scare tactics** (such as emphasizing death) as studies show they do not work well in persuading the vaccine hesitant to agree to be vaccinated. Please go to [sccfreevax.org](https://sccfreevax.org) for more information.
- **Avoid stigma.** Have others review your script and draft video for any stigmatizing messages that may unintentionally imply shaming of individuals who are not vaccinated.
- The CDC has some guidance on this topic: <https://www.cdc.gov/coronavirus/2019-ncov/daily-life-coping/reducing-stigma.html>
- **Model your call to action.** What do you want your audience to do after watching your video? Show your audience how they can do this. For example, your actors can:
  - Model what can be done about reducing vaccine hesitancy by encouraging their peers to:
    - Know the facts and get the facts from reputable sources. Having the facts can help reduce confusion and fear around COVID-19 and vaccines.
    - Address misconceptions circulating among your peers and the vaccination process. Talking openly about these topics can help normalize the subject.
    - Take action by leading others with supportive behavior.
    - Talk with peers about:
      - Parental consent
      - Health impacts of COVID-19 on youth
      - Talk with a parent, coach, doctor or other trusted adult about COVID-19 and COVID-19 vaccine concerns
  - Mention other methods that help encourage vaccination:
    - Emphasizing group safety, classmates, and family
    - Pointing out all the benefits of being vaccinated
    - Dispel some of the most common myths around COVID-19 and vaccines
    - Stress the importance of securing the best future possible
